

LED LIGHTING - NOXEL LED HIGH BAY

No more Heating, LED High Bays

Less Heat, More Comfortable

LEDs especially High Bay do not emit as much heat as conventional HPS (High Pressure Sodium) High Bays. So no more worries on the lights getting too hot and start burning the top of the roof. The LED high bay also makes people working under the light more comfortable. Safety yet comfortable.

Maximum Throw, Even Lights

We engineered our High Bay Luminaire for maximum throw, either design with lens or without lens to suit the current application in question. The end result, end users will get the same level of brightness but more even lighting effect.

Applications:

- Industrial Buildings
- Warehouse
- High Ceiling Area

Model:

NX-HB-100W: 100W/9000lm

NX-HB-150W: 150W/12500lm

Thinking of lights the different way. Save more, do more with LEDs.

NOXEL LED. *Light of the future.*
