

LEDs lighting up the streets

Tailored White Light

Our street LED luminaire can be tailored to just about any hue of white required and can be selected to suit the type of street in question. For example, warm white light with a colour temperature of 2700 to 3000K is right for residential area or historical town centre. Neutral white which is around 4000K are appropriate for busy roads and business parks.

Modular Concept

We build this LED luminaire with a modular concept to facilitate system maintenance and make it easier to replace LED modules at the end of their service life. Also, our economy of scale means that the consumer is getting efficient LED at more competitive prices. Each of our modules are 30W which can produce up to 3000 lumens.

Applications:

- Highway Lighting
- Pedestrian Street
- Compound Lighting
- Outdoor Car Park

Model:

NX-SL-30W: 30W/3000lm

Up to (30W per module)

NX-SL-180W: 180W/18000lm
